

**NOTES:**

Do not heavily prune the tree at planting. Prune only crossover limbs, co-dominant leaders, and broken or dead branches. Some interior twigs and lateral branches may be pruned; however, do not remove the terminal buds of branches that extend to the edge of the crown.

Mark the north side of the tree in the nursery and rotate tree to face north at the site whenever possible.

See Tree Specification for additional critical tree planting requirements.

\*For trees in containers, remove container prior to planting; for bare root trees, place tree in middle of planting hole, spread roots out radially from the trunk around the prepared hole.

**Tree Planting**

Not To Scale

**NOT FOR CONSTRUCTION PURPOSES**
